

New Weather Bureau Publication

"Climatic Summaries of Resort Areas—Berkeley Springs, West Virginia" (*Climatography of the United States* No. 21-46-1), by H. E. Landsberg. For sale by Superintendent of Documents, U.S. Government Printing Office, Washington 25, D.C. Price: 5 cents.

This is the first of a series of pamphlets designed to give information on local weather at various resort and spa areas in the United States. For Berkeley Springs, a brief description of the region's topography and general climate is followed by a month-by-month description of the kind of weather to be expected. Tables are included to show range of temperature, amount and usual duration of precipitation, etc., and information on the mineral content of the baths.

Pamphlets on other resort areas will be issued from time to time.
